MARKET OUTLOOK

The long-term demand for better resource productivity is a result of megatrends such as population increase, a growing middle-class consumer base and greater urbanization. Technology is a key enabler in meeting this challenge, and TOMRA is favorably positioned towards these trends.

Cost inflation will continue to be a pressure point. Pricing actions and cost measures are expected to mitigate supply chain and inflation effects in the medium term. The direct impact of high energy prices is relatively limited for TOMRA.

Collection

With several new deposit initiatives in the pipeline, the division will continue to experience high activity related to preparation for new markets. Quarterly performance will be dependent upon timing of new initiatives.

Recycling

The positive momentum in Recycling is expected to continue. The demand for circular solutions, fueled by consumer awareness, regulatory requirements, and sustainability commitments from the industry, will continue to create opportunities.

Food

The outlook remains positive for medium and longterm opportunities. The demand signals are good despite a tougher economic backdrop. Higher labor costs are driving the need to automate in the longer term.

Currency

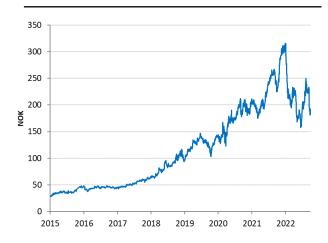

Reporting in NOK and with some NOK cost base, TOMRA will in general benefit from a weaker NOK, measured against EUR and USD.

THE TOMRA SHARE

The total number of issued shares at the end of first quarter 2022 was 296,040,156 shares, including 800,000 treasury shares. The total number of shareholders decreased from 12,220 at the end of second quarter 2022 to 11,812 at the end of third quarter 2022.

Share Price

TOMRA's share price increased from NOK 182.68 to NOK 192.38 during third quarter 2022. The number of shares traded on the Oslo Stock Exchange in the period was 30 million, up from 20 million in third quarter 2021. Average daily turnover increased from 76 MNOK in third quarter 2021 to 97 MNOK in third quarter 2022.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

NOTE 1 Disclosure

This interim report has been prepared in accordance with IAS34, and in accordance with the principles used in the annual accounts for 2021). The quarterly reports do not however include all information required for a full annual financial statement of the Group and should be read in conjunction with the annual financial statement for 2021. The quarterly reports have not been audited. The quarterly reports require management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. The significant judgments made by management in preparing these condensed consolidated interim financial statements in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ending 31 December 2021.

A number of new standards, amendments to standards and interpretations were not effective for the period ended 30 September 2022 and have not been applied in preparing these consolidated financial statements. Those that may be relevant to the Group are set out below. The Group does not plan to adopt these standards early. These will be adopted in the period that they become mandatory unless otherwise indicated:

IFRS 17 Insurance Contracts

Amendments to IAS 1 Presentation of Financial Statements
Amendments to IAS 8 Accounting policies, Changes in Accounting Estimates and Errors
Amendments to IAS 12 Income Taxes

TOMRA is considering the effects of the future adoption of these standards. The current assessment is that TOMRA does not expect any material effects in the financial statements from the new standards.

Revenue recognition: Revenues from sales and sales-type leases of the company's products are generally recognized at the time of installation. Revenues from service contracts and operating leases of the company's products are recognized over the duration of the related agreements. Other service revenues are recognized when services are provided.

Seasonality: The Material Recovery operations, to some extent the US Reverse Vending operations as well as the Collection Australian operations are influenced by seasonality. The seasonality mirrors the beverage consumption pattern, which normally is higher during the summer than during the winter.

Financial exposures: TOMRA is exposed to currency risk, as only ~1% of its income is nominated in NOK. A strengthening/ weakening of NOK toward other currencies of 10% would normally decrease/increase operating profit by 10-15%. An increase in NIBOR and EURIBOR of 1 percentage point, would increase financial expenses by ~NOK 10 million per year.

Segment reporting: TOMRA is organized as three divisions; TOMRA Collection, TOMRA Recycling and TOMRA Food. In addition, the corporate overhead costs are reported in a separate column. The split is based upon the risk- and return profile of the Group's different activities; also taking into consideration TOMRA's internal reporting structure.

- TOMRA Collection consists of the business streams Reverse Vending (development, production, sales and service and lease of Reverse Vending Machines and related data management systems) + Material Recovery (pick-up, transportation and processing of empty beverage containers on behalf of beverage producers/fillers on the US East Coast and in Canada)
- TOMRA Recycling is a provider of advanced optical sorting systems to the Recycling and Mining industries.
- TOMRA Food is a provider of advanced optical sorting systems to the Food industry.
- Group Functions consists of costs related to corporate functions at TOMRA's headquarters

Assets and liabilities are distributed to the different reporting segments. Cash, tax positions, and interest-bearing debt (not including IFRS 16 lease liabilities) are allocated to Group Functions. There are no material revenues from transactions with other business areas. There were no material related party transactions in 2021 or 2022.

Alternative performance measures

Alternative performance measures used in this report are defined in the following way:

- **EBITDA** is the calculated profit (loss) for the period before (i) income tax expenses, (ii) finance income and expenses, (iii) amortizations and (iv) depreciations.
- **EBITA** is the calculated profit (loss) for the period before (i) income tax expenses, (ii) finance income and expenses and (iii) amortizations.
- **EBIT** is the calculated profit (loss) for the period before (i) income tax expenses and (ii) finance income and expenses.
- Depreciations is the allocated cost of tangible assets over its useful life + write downs related to the same assets
- Amortizations is the allocated cost of intangible assets over its useful life + impairment losses related to the same assets
- **Net interest-bearing debt** is calculated as the difference between interest-bearing debt and cash. Interest-bearing debt includes loans from financial institutions (current and non-current loans) and lease liabilities (current and non-current). Cash includes cash equivalents as short-term deposits, cash funds and bank accounts.
- Currency adjusted revenues/gross contribution/operating expenses/EBITA is the revised revenues/gross contribution/operating expenses/EBITA after adjusting for estimated currency effect.
- Order backlog is defined as the value of firm orders received within TOMRA Recycling Mining and TOMRA Food that has not yet been delivered (and consequently not yet taken to P/L).
- Order intake is defined as Order backlog at the end of a period minus Order backlog at the beginning of a period plus revenues for the relevant period
- Cost of goods sold refers to the direct costs attributable to the production of the goods sold.
- Gross contribution is defined as Revenues minus Cost of goods sold
- Gross margin is defined as Gross contribution divided by Revenues in percent.
- Operating expenses is defined as Revenues minus Gross contribution minus EBITA
- **EBITA margin** is defined as EBITA divided by Revenues in percent.
- Gearing ratio is Net interest-bearing debt / EBITDA

TOMRA has been influenced by the COVID 19 pandemic, but in general more limited than other industries, as most of TOMRA's customers have been classified as "essential businesses" that have continued to operate during the crises. Food retail, Food producers and Waste management represents the most important customer segments, which all have been operating with only limited interference.

The direct impact of Russia's invasion of Ukraine and subsequent sanctions is very limited for TOMRA. Measures have been put in place to apply by the imposed sanctions and the situation is being monitored closely.

TOMRAs revenues and profit have therefore only been moderately impacted by the crises. There have not been identified any new impairment triggers. There are no material B/S items that are viewed as further exposed due to the crises. There is significant headroom towards the loan covenants. The liquidity reserves are good, and access the eventual additional funding is satisfactory. Tomra has only received limited government grants and support during the crises. There have not been identified any going concern topics.

About TOMRA

TOMRA was founded on an innovation in 1972 that began with design, manufacturing and sale of reverse vending machines (RVMs) for automated collection of used beverage containers. Today TOMRA provides technology-led solutions that enable the circular economy with advanced collection and sorting systems that optimize resource recovery and minimize waste in the food, recycling and mining industries.

TOMRA has more than 100,000 installations in over 80 markets worldwide and had total revenues of ~10.9 billion NOK in 2021. The Group employs ~4,600 globally and is publicly listed on the Oslo Stock Exchange. (OSE: TOM).
